At least 2 in 3 Australians will be diagnosed with skin cancer in their lifetime.

But it's one of the most preventable cancers.

43%
rarely or never check the UV index

26%
have never had a skin check

80%
don't know the SCAN method[2]

Skin cancer is common. Protect your skin every day. Check it every month.

- Check **UV index daily** in your weather app
- Use protection when **UV is 3+**
- Check your skin regularly for **new or changing spots.**[1]

Scan the QR code to visit **TAL SpotChecker** to learn more.
